

EXTERIOR MIRROR

Abstract

- 5 The present application includes a vehicle mirror which includes an approach light in the attachment assembly. The approach light is a single light source positionable in relation to predetermined inputs for directing light to various areas, depending on the inputs. Additionally, an intercom system is provided for communication between the interior of the vehicle and exterior of the vehicle, by way
- 10 of the vehicle mirror. Also, a remote sensor is utilized to set predetermined memory positions of interior vehicle components such as seats, steering columns and brake pedals. This allows customization of the interior components upon an individual's approach to the vehicle.
